

Black Lion Audio: 500 Series BLABO Bottle opener / blank panel

Need the strength of a lion to open up your hearty holiday beverage after spending time with the family? Lucky for you, Black Lion Audio is here to help with this sleek and oh-so-functional bottle opener! BLABO can be stored for safe-keeping in any 500 Series rack. Not for use while mounted though—that will result in a very sudsy accident.

Focal: Sphear S In-Ear Headphones

Sphear S design breaks with convention and proves that high fidelity in-ear headphones can be used for hours on end without the slightest discomfort. Sphear S has the historic Focal sound signature: a rich midrange, accurate and clear, faithful to the original work, with harmonic richness from low end to high end.

Håkan: P110 Pop Killer

The Håkan P110 Pop Killer is a special pop filter that not only effectively prevents plosives but also uses foam that eliminates audible tone coloration that other pop filters often display. The foam is hydrophobic so it won't absorb moisture, and is easy to keep clean.
