Studio grade connectivity.

Your studio needs more than accessible patching — audio quality throughout every signal chain is essential. Black Lion Audio has been trusted for years for modifying the best gear and making it better, and that's what it took to create the new PBR patchbay series.

Every PBR product uses audiophile-grade connectors. Every contact point is gold-plated; a major factor that's missing from most patchbays that you might have encountered. Black Lion's team of engineers have worked tirelessly to ensure that the PBR series delivers proper quality through-and-through.

The PBR patchbay series is also built Black Lion-tough, with

black-anodized aluminum faceplates that also make for a matched and sophisticated look.

PBR TT

The PBR TT is a 96-point TT/DB25 patchbay, suitable for the most robust routing imaginable in a single rack space. Normal, non-normalled, and half normaled modes are available per-module via top-panel switches rated to 10,000+ operations. The twelve DB25 connections are securely mounted to an internal steel backplate to prevent wear from frequent reconnections. Every TT jack is a custom-made Black Lion Audio gold-plated connector for ultimate performance.

PBR TT: 96-Point Gold-Plated TT Patchbay

PBR TRS-BT: 48-Point Gold-Plated TRS Patchbay plus Bluetooth

PBR TRS: 48-Point Gold-Plated TRS Patchbay

PBR XLR: 16-Point Gold-Plated XLR Patchbay

Studio grade connectivity.

Your studio needs more than accessible patching – audio quality throughout every signal chain is essential. Black Lion Audio has been trusted for years for modifying the best gear and making it better, and that's what it took to create the new PBR patchbay series.
