

Professional power.

The PG-XLM Type F is a rackmount 7-outlet power conditioner/surge protector with PG-90 Filtering Technology; 1 pull-out lamp; real-time voltage meter; six rear-switched; filtered and surge protected outlets; one front-panel unswitched convenience outlet, and a USB port for device charging.

It takes more than a few rack-mounted outlets to inspire true confidence in your power conditioner, and that's where the PG-XLM Type F delivers: best-of-class power filtering!

Confidence
inspiring power.

Our power conditioners and regulators don't only give your equipment investment the best power it can get — they also deliver peace of mind as they protect your studio from dangerous power surges. We poured all of our mod know-how into the PG-family of power conditioners for enhanced power filtering, noise rejection, and more, helping you to coax every

ounce of high performance from your equipment. of professionals on a smaller budget felt left out, as some features might not be as important as an economy price-point. The PG-XLM Type F was built with this in mind, while still providing best-of-class power conditioning!

ounce of high performance from your equipment.

After creating the original PG-1, Black Lion Audio knew that plenty

High-end filtering.

Your gear deserves the best power, and we took great care in making sure the PG-XLM Type F delivers just that — thanks to PG-90 Filtering Technology. In testing, this has provided up to **90% of noise filtering**, as opposed to the typical average of 76% found in other power conditioners at the same price point.
